DEMAGOGUE ON THE BRAIN.

Augustus Sala, in one of his recent letters on America, describes the residents of the New York Broadway as being inflicted with a disease he terms as "flag on the brain." The flaunting bunting, the pictorial representations that stretch across the street from house-top to house-top, are evidences in his eyes of a morbid taste for the flaring frippery of the banner. There is something in the re mark, but its force and appropriateness are borrowed from the very class of people he caricatures. The phraseology is truly American. In California we meet often with the rather paradoxical term of "feet on the brain," but no one misunderstands the application, and it conveys probably in the strongest manner the idea of that kind of monomania which occasionally takes possession of holders of or speculators in mining stock. We have amongst certain people is both Vancouver Island and British Columbia a disease which the English language finds a difficulty in expressing-a morbid affection of the thinking faculties on all matters connected with public interest which is not easily denoted in the medical lexicon. We

shall take a leaf from Mr. Sala and our American neighbors, and describe the malady as demagogue on the brain." No sconer is any measure brought forward for the public benefit than these unfortunate afflicted person howls out " Demagoguism.' The more popular the measure the more rabid the denunciation. Let a public man attempt to apply those laws which have done so much towards the settlement of other new coun tries, and the effect is like holding up a red flag before the eyes of a mad bull. The brain of the patient becomes alarmingly excited, and with eyes wildly staring, and gestures ferceious, he hurls at the head of the unlucky politician the word " Demagogue.' see, however, what is the result o the "demagogue" legislation. Hitherto the most substantial interest on the Island has been the most languishing. The agricultural prospects of the country up to the present year have been of the most hopeless charac ter. Men who had taken up farms in '59, '60 and '61 gave up their occupation and left the country in disgust. The majority of the pre-emptors settled upon the soil as a kind of forlorn bope, looked helplessly on the difficulties to be encountered before the produce could be raised, looked dismally at the probabilities of getting it to market when it had been raised, and viewed even in a more hopeless light the prospects of finding profitable customers when they had the produce in Victoria To those who were already on the soil, everything was blank and gloomy; to those who came to the country as intending settlers the circumstances that presented themselves were of the most disheartening character. This was the state of affairs when the "demagogue" policy came into work. It was then ought desirable that the farming interest should be encouraged—that the land should be settled up, and that efforts should be made to retain a permanent population in the country. The necessity was doubly pressing, when other interests on which the country had previously relied were sustaining at the time a severe reaction. The "demagogue scheme, without taking a single stone from the commercial fabric, went to build up the interest of languishing agriculture, and so we see to-day, amid all the dullness in trade, a healthy appearance for the first time since '58 in the cultivation of the soil. Go where we will throughout the country districts, where the speculator's curse has not sealed up the resources of nature, we find the earth bringing forth its fruit. The whole appearance of things has changed. The quantity of land under cultivation in some places has doubled -- in some quadrupled. The farmer himself is a different man; the settled gloom and wretchedness which were of wont the prevailing characteristics of the cultivator of the soil have given place to a healthy energy and hopefulness, and nature seems to have rewarded him with the promise of an abundant yield. Small as the inducements were which the House of Assembly held out the past session to the farmer, they were sufficient to give such a stimulus to cultivation as will render us no longer dependent on our American neighbors for many of the necessaries of life. The Victorian market will the present year be almost totally supplied with Island produce, and supplied at a price with which Puget Sound cannot successfully compete. The dreadful prognostications of dear food which were uttered by some of the political economists when the question of af-fording the farmer some encouragement for his labor came up, will be most unmercifully falsified. We feel bound to say that the pre sent year will be one remarkably cheap for every kind of produce. Of course in this particular it will casually appear that the general community will be benefited at the ex pense of the farmer; but it is only casually it will seem so. The largely increased quantity of produce which the agriculturist will be able to send into market will allow of a very considerable reduction

hope we shall continue to see such blows at the true interests of the country; let us look forward to the day when the ruin of the island shall be complete, and the thousands of acres of land now in their wild, primitive condition, turned into grateful producers of the necessaries of life, all through the action of those horrible and much to be condemne members of our community the "politica

first instalment of "demagoguism." Let us

Extraordinary yield of the Ericeson Co
\$30,816 in One Week.

This claim seems to increase in richness every day. The amount taken out for the week ending 2nd inst. was 1400 ounces. For the week ending yesterday the 9th it amount ed to 1926 ozs., viz., on Tuesday, 883½ ozs., Thursday, 439 ozs.; Sunday, 603} ozs.; making a total of 1926 ozs., worth \$30.816. Out of this sum the shareholders will have to contribute nearly \$1000 to the Government for Evenet two. The dividends naid ment for Export tax. The dividends paid ment for Export tax. Grouse Creek. BED ROCK FLUME.—The company who were so fortunate as to secure the right of putting a flume here are losing no time in prosecuting the work. The flume was commenced only in August last year, and there is now upwards of eleven hundred feet completed was continued in the company of the compan pleted apparently in a most substantial man-ner! it is not so large as either Antler or ner! it is not so large as either Antler or Williams creek flumes, but, in our opinion, it is capacious enough for a creek the size of Grouse. The company will never have any trouble with "tailings" from the flume, as at the point where they are discharged there is a fall of at least twelve feel. A vast deal of work has been done this seeson in ground sluicing the bed of the creek where it is designed to law the flume and thus profit will signed to lay the flume, and thus profit will arise to the company at the same time the work is going forward. Cunningham Creek

The news from this locality is not at present of a very exciting character, but in the course of a week or so we fully expect that matters will take a more lively turn. The ditch was completed last Saturday afternoon; the altitude of the ditch above the flat is such that bydranlies.can be worked with from 70 that hydraulics can be worked with from to 100 feet fall; there are two pipes at world now, and several others are getting ready; the hydralic system of mining is the most profitable of any where sufficient fall can be had, and this creek seems pre-eminently suited for the adoption of the process. Oro Fino Creek.

A company of white men have taken up ground on this creek, and intend putting in a flume. A large number of Chinamen have been at work upon it, but like all their countrymen here they have evaded payment. of license and recording fees. Since the white men made a raid upon them we learn that quite a number of the Celestials have Steven's Creek.

Mining on this creek is progressing satisfactorily. The Blackpool bed rock flume company washed up, on Friday last, sixty ounces of coarse gold. They have discovered the old lead which has been for some time past supposed to be lost. The Matrimonial company, below Brown a Kerey's have been constant in bround shuicing for the last four engaged-in ground sluicing for the last four bed rock looks remarkably well, coarse gold being easily found on the exposed rock. They will wash up in about a week hence.

FOURTH OF JULY IN CARIBOO-There was FOURTH OF JULY IN CARIBOO—There was scarcely an observance of Independence Day on Williams Creek. The only outward and visible sign was two American Sags in Barkerville, one in Comerconton, and one over a shaft house on the creek. The fact is that there are now comparatively very few American miners in Cariboo, the imposition of the hostile tariff and the Gold Export Tax having driven them out of the country last spring.

Accident—An accident of a rather painful nature befel Mr. Pavid Grier on Saturday evening last. Mr. Grier was working in the shaft of the Bald Head claim, in which he is a shareholder; the bucket used for hosting the clay out of the shaft was about being lowered when it got disengaged from trope and fell down a distance of twenty feel rope and fell down a distance of twenty feel on Mr. Grier, striking him on the left arm and fracturing one of the bones below the elbow. Dr. Bell was summoned and attended immediately; under his care the unfortunate sufferer is getting on well.

A JUMPER JUMPED—A man who represented himself as a miner, called at the Gold Commissioner's house on Wednesday last, and finding Mr. Cox in tried to extract an opinion from him as to how he was to jump'a claim. The Commissioner told the impudent intruder that he was in the wrong place dent intruder that he was in the wrong place to get any advice on the subject and he had better decamp. Not heeding the worthy maggirate's advice the would be jumper importanted for his opinion on the point, when Mr. Cox committed him there and then for contempt. After undergoing two hours' solitary confinement in the lock-up the prisoner was brought before the Commissioner. He was harmly applying for his cannot be sold the solitant of the so was brought before the Commissioner. He offered the most humble apology for his conduct, and promised if let off never to be seen near the precincts of the court house again. Mr. Cox discharged him and he departed a wiser if not a better man for the short incarceration. This is just the right way to stop the reprehensible practice of which Judge Begbie complained lately on the bench.

New York, June 30-The Washington special despatch to the Times says: A com-prehensive order relating to the consolida-tion of the different Army Departments of new Military Divisions will be issued as yesterday. A convenient structure had been erected at one end of the building, covered with evergreens, and provided with seats for the accommodation of visitors, who attended during the day in large numbers and manifested the liveliest interest in the proceedings. A very pretty platform, carpeted and decorated, was constructed for the examination of the girls. Immediately in front of the drop the same and a new Department formed, conversions and the present mustering out of troops is soon as the present mustering out of troops is soon as the present mustering out of troops is completed. Several corps of the Army of the Potomac will each be reduced to divisions, the whole to constitute a provisional army corps, to be commanded by Brig. Gen. Hollowars Pills.—General debility, low spirits, and nervous irritation, are the consequences of dyspepsia or indigestion. The Pills soon give tone to the stomach, renovate the digestive powers, purify the blood, and give strength to the whole system. Sluggishness of the budy and depression of the mind are succeeded by a cheerfal activity of the physical and mental functions. Indigestion is the parent of so many evils, and is so common, so universal a complaint, that it is a great biessing that such a remedy as this and 1950 common, so universal a complaint, it is a great biessing that such a remedy as this invaluable medicine should have been discovered No one need long suffer from indigestion with these Pills at hand.

The Infallible Remedy.

Holloway's Ointment.

Contracted or Stiff Joints.

All the medicines in the London dispensaries would barely benefit, much less cure, any chronic ases of contracted or stiff joint; whereas if this available ointment be effectually rabbed into such arts twice a day, the effects will be immenso. Taralytic patients even can derive advantages from his fine remedy when other means fail.

Diseases. Scorbutic humors arise from an impure state of the blood, and in most cases the liver and stomach are the organs at fault. The Pills will speedily restore these to a healthy action; while the Ointment if well rubbed in at least twice a day, will soon cure any case of skin disease. Soldiers, sallors, and miners, use this famous Ointment in all parts of the world. Disorders of the Kidneys, Stone and Grave

In any of the above complaints more benefitmay be derived in twenty-four hours by adopting the following simple means than is frequently brough about in six months by any other treatment. In bad cases if the Ointment be rubbed into the small of the back over the region of the kidneys, it will quickly penetrate, and, in most instances, give immediate relief. Six or eight of the Pills should be taken nightly according to circumstances.

Districts for Threats & Districts and the pills of the pills

Diptheria, Sore Throats, &c. Diptheria, Sore Throats, &c.

These maladies are of so serious and dangerous a nature that the Ointment would not be recommended unless the Proprietor was sure of its effect. It will cure when every other means have failed, if applied immediately, and not dayed until the patient is beyond recovery. It is a sovereign if the nation is beyond recovery. It is a sovereige medy for sore throat. Settled Coughs or when me will be promptly removed by rubbing in the national Mothers should rub it into the chest unguent. Mothers should rub it into the chest of heir infants whenever there is any hourseness; ightness, or other affection of breathing.

Bad Logs, Bad Breasts—Old Wounds, Sores

and Ulcers. and Ulcers.

It is surprising how quickly a sore, ulcer, or wound, deprives the body of strength, and unfits it for the duties of life; but it is no less wonderful to watch the effect of Holloway's Healing Ointment, when it is used according to the printed directions, and assisted by appropriate doses of the Pills. The pain, inflammation, and other morbid manifestations, soon disappear from the affected part and health and strength return.—This treatment creates sound flesh, and therefore makes its cures complete.

Gout and Rheumatism. Ex "Sierra Nevada."

Gout and Rhoumatism.

Will be cured with the greatest certainty if large quantities of the Ointment be well worked into the complaining parts. This treatment must be perseveringly followed for some time and duly assisted by powerful doses of Holloway's Pills. The essence of these diseases lies in the blood, which has floating through each vessel the paingiving poison which vitiates and inflames every tissue t comes in contact with, and produces the hot, swoilen, elastic enlargement about the joint so och aracteristic of gouty and rheumatic maladies Gout and Rheumatism.
